

Rethinking Independence Day

A lecture by Michael Repkin for Urban Habitat Chicago

People are looking for ways to be less dependent on traditional water, energy and food sources and this discussion will address these concerns and provide opportunities for action

Wednesday, July 1, 2009 from 7:00 – 8:00 p.m.

Budlong Woods Branch Library, 5630 N Lincoln Ave, Chicago, Illinois 60659

Register at: www.urbanhabitatchicago.org (seating limited to 30)

Rethinking Independence Day

A lecture by Michael Repkin for Urban Habitat Chicago

As we move forward in a new reality, we must find new ways to create resilient independent systems to provide ourselves and our loved ones with life support. People are looking for ways to be less dependent on traditional water, energy and food sources and this discussion will address these concerns and provide opportunities for action. One way to ensure an abundance of resources is to examine our interaction with these resources. Michael Repkin will provide an overview of human life support, the 2175 concept and will discuss the SWEN model of resource analysis.

Wednesday, July 1, 2009 from 7:00 - 8:00 p.m.
